

# Simplify Your Network Stack

Wi-Fi isn't just about connecting devices anymore. It's about connecting people to your brand to build loyalty.

Whether in hotels, apartments, or retail shops, a secure, high performance Wi-Fi experience is critical to customer satisfaction. The ElevenOS guest Wi-Fi platform is designed for plug and play integration with Aruba Mobility Controllers in businesses of all sizes. The joint solution makes it easier to securely authenticate guests and centrally manage the network for a consistently great Wi-Fi experience across multiple properties.

It's managed Wi-Fi made simpler, smarter, and more secure.

## ElevenOS Enhances Aruba Mobility Controllers for Smarter & More Seamless Managed Wi-Fi

### Centralized Authentication

At its core, ElevenOS is a central authentication platform and we help companies dream up and deliver a great Wi-Fi experience. Options include auto-authentication via Hotspot 2.0, third-party integrations (PMS, loyalty, etc.), group access codes, email capture, and more.

### Custom Captive Portal Templates

Delight guests with dynamic, multi-lingual captive portals that are easily managed centrally across all properties. Create revenue and engagement opportunities with tiered plans and links to onsite amenities and local attractions with responsive design to support most devices.

### Tiered Internet Plans & Billing

Drive incremental revenue with tiered plans to meet guest needs. Today's guests understand the value of enhanced Wi-Fi and are willing to pay for more speed and devices. ElevenOS integrates with leading property management systems (PMS) and 100+ credit card gateways for billing ease.

### Dynamic Content Filtering

Enhance privacy and safety with Layer 7 firewall rules based on the application or website, like those with adult or malicious content. Create even more dynamic service plans like social media access only or upsell a streaming plan with access to Netflix, Hulu, and others.

### Cloud-Managed Network Tools

Get the benefits of cloud-managed Wi-Fi, while streamlining your onsite infrastructure requirements. Save time with dynamic service provisioning and bandwidth optimization across multiple areas, users, and devices at once. ElevenOS works with both wired and wireless on MX and MR devices.

### Actionable Analytics & Reporting

Better manage the connected guest experience across multiple properties within a brand or portfolio with usage and revenue tracking, bandwidth allocation reports, and more. Analyze rich Wi-Fi data from single properties or groups from a centralized web-based dashboard.

# Eleven & Aruba Are Stronger Together

## Boost Loyalty with a Better Experience

Automatic and fast Wi-Fi is a powerful incentive for loyalty, while custom captive portals enhance brand recognition and consistency.

## Offset Costs with Flexible Billing

With dynamic access plans and flexible billing options, including PMS and credit card, ElevenOS enables companies to offset network costs.

## Improve Efficiency for IT Teams

ElevenOS enables centralized Wi-Fi management with user-friendly dashboards and real-time analytics built for non-IT staff.

## The ideal solution for...

### Hospitality, Retail & Healthcare

ElevenOS combined with Aruba hardware provides a cost effective solution to centrally manage the guest Wi-Fi experience across all devices and properties with no additional hardware required. Create engaging branded portals and manage tiered Internet from a simple user interface. Manage bandwidth and performance in real-time with robust dashboards for guest Wi-Fi that is simple, seamless, and secure.

### Apartments, Senior Living & Student Housing

ElevenOS makes enterprise-grade Wi-Fi management easy with Aruba equipment in the multifamily industry including apartments, senior living, student housing, and more. Eleven's central guest Wi-Fi platform enables secure billing, authentication, custom captive portals, and easy tenant onboarding. Non-technical property staff can easily manage resident Wi-Fi in just a few clicks.

## Strategic & Trusted Wi-Fi Expertise

### 1B Annual Authentications

With over 100 million authentications per month, ElevenOS is a proven solution with over 99.5% uptime

### 5,000+ Global Customers

ElevenOS is trusted by thousands of customers across 24 countries in multifamily, hospitality, and beyond.

### 15+ Years of Innovation

Founded in 2002, Eleven truly understands the history of Wi-Fi and where its headed.
